

Client file – contact charting

“Contact entry in Hassan’s file” – (partial)

Client name: Hassan Abdi

Date: August 16, 201X

Date of charting: August 16, 201X

Date of contact: August 16, 201X – 75 minute appointment at Hassan’s case manager’s office

Initial appointment with Hassan Abdi. Hassan was referred for case management following a hospitalization at Hennepin County Medical Center following an incident where Hassan was assessed has a risk of harming himself. Hassan denies that he intended to harm himself; and denies that he may have a mental illness. He reports no current intent or impulse to harm himself. Discussed case management services and role of case manager. Began to assess his living situation and goals and functioning (see partially complete functional assessment). Hassan’s is an immigrant from Somalia. He has been in the United States for about nine years. Hassan’s English skills are good; he agrees that there is not a need for an interpreter. Hassan lives in apartment with his mother and four siblings (see file face sheet for contact information). His father died in Somalia – perhaps related to political conflict in that country. Hassan is unemployed; no current source of income. He is very interested in obtaining employment. He would possibly like to explore automotive mechanics training. Hassan is eligible for Medical Assistance. Hassan expressed serious reservations about accepting case management services. Next appointment is at Hassan’s home at 2:00 on August 30, 200X. Task is to continue to build working relationship; continue assessment and develop initial plan. Diagnostic will need clarification for confirmation of eligibility.

Rob Jones
Senior Case Manager
