

Use this framework to assess why and how to use a large language model (LLM) to execute your own language access strategy.

WHAT ARE YOU TRANSLATING AND WHY?

What're your guiding principles? How quickly do you need content translated? How much? How often?

WHAT TRANSLATION TOOLS/RESOURCES EXIST?

How do you evaluate your tools/resources — cheap/fast/good, or something else? How long do translations take with each tool/resource? Do you have funding to expedite?

WHY USE AN LLM AND WHICH ONE?

How do LLM options meet your needs (or not)? How could an LLM help you bridge gaps in equity?

IF YOU DECIDE TO USE AN LLM, HOW DO YOU USE IT?

How do you prepare your LLM? How do you prepare your content? What's your quality assurance plan?
